1983 IN NEW YORK STATE

Trends in New York State's economy reflected the recovery from the national recession in 1983. Robust fourth-quarter gains pushed most major measures of economic activity ahead of prerecession levels. Record levels of activity were recorded in services and finance; personal income outpaced inflation; employment growth was registered in most nonmanufacturing industries; and the unemployment rate remained well below that posted for the Nation as a whole. On the negative side, the State's industrial sector continued to lose ground at a slightly faster rate than the Nation's, with high-tech oriented areas, such as Nassau-Suffolk and Poughkeepsie, generally turning in better performances than older industrial centers like Buffalo.

National Trends

Lower interest rates, reduced rates of inflation, followed by large-scale consumer spending, particularly on durable goods products, and a surge in private housing starts all contributed to the turnaround in the U.S. economy in 1983.

The economy's resurgence was clearly marked by growth in the Gross National Product which rose from $3,069.3 billion in 1982, to $3,304.8 billion in 1983. This represented a gain in real output of 3.7 percent on the heels of a 2.1 percent decline a year earlier. Personal income for the Nation totaled $2,734.1 billion in 1983, an increase of 6.1 percent from 1982, and inflation subsided to 3.2 percent, the lowest rate since 1967.

Business Activity Sets Record

The economic climate of New York State, as measured by the Business Activity Index, advanced four points, from 116 (1967 = 100) in 1982 to 120 in 1983 (highest annual level ever). The Index, designed to measure the total volume of goods and services produced by the private sector (unaffected by price changes) was up each month in 1983, compared with the like month a year earlier. The greatest year-to-year improvement (six points) was registered in the fourth quarter. At 117 in January, the Index gradually improved over the year and settled at 122 in November and December. Starting in March and continuing throughout the year, the overall Index attained record monthly levels, and with the exception of transportation, communications, and public utilities, each of the components gained ground over the year. Construction and retail trade generally outpaced the field in improvement, while finance, insurance and real estate climbed to unprecedented heights.

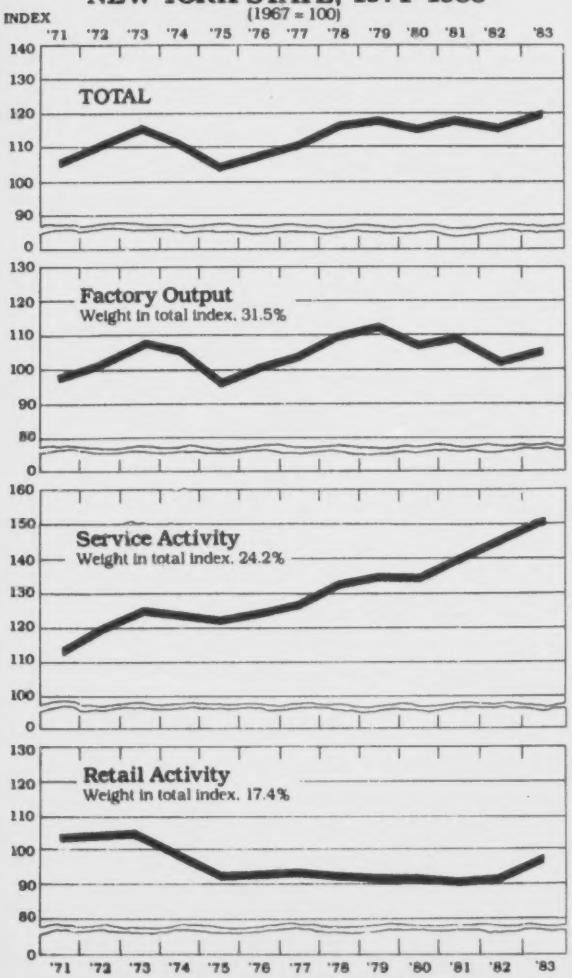
Personal Income Continued to Grow Faster in New York

According to the U.S. Department of Commerce, total personal income in New York State grew from $214.4 billion in 1982 to $229.5 billion by 1983. This year-to-year gain of 7.0 percent compared quite favorably with the 6.1-percent increase for the country as a whole. New York State also increased its advantage over the national average in per-capita income, registering a 6.4-percent gain in moving from $12,204 in 1982 to $12,990 in 1983 (ranking seventh among states). Per-capita income in the United States rose only 5.1 percent over the period, from $11,113 to $11,685.

Job Gains Confined to Nonmanufacturing Industries

Total nonagricultural wage and salary employment averaged 7,285,300 in 1983, up 30,700 from a year earlier. Beginning in April, total nonfarm employment for each month topped the level posted for the like month a year earlier (with the exception of a minor August setback). Year-to-year employment gains among nonmanufacturing industries (+83,900) were tempered by cutbacks in the

INDEX OF BUSINESS ACTIVITY and its Major Components[1] NEW YORK STATE, 1971-1983



[1]Components not charted here, and their weights, include: Transportation, Communications, Public Utilities Activity (8.6%); Finance, Insurance and Real Estate Activity (7.6%); Construction Activity (5.5%); and Wholesale Activity (5.2%).

manufacturing sector (−53,200). With the exception of job losses in transportation, communications and public utilities (−13,300), largely due to losses in telephone and telegraph industries, and wholesale trade (−4,400), all nonmanufacturing segments recorded increases over the year. The leading ground gainers were services (+47,800) and retail trade (+28,900).

The State's unemployment picture also brightened somewhat toward the end of 1983. Although total joblessness was up marginally from 684,000 in 1982 to 689,000 in 1983, the number of unemployed fell below year-ago levels throughout the fourth quarter. Total unemployment at the national level was also up slightly over the year; but was able to drop below the previous year's level by July.

The unemployment rate in the State fell below the previous year's proportion in each of the last five months of the year. Overall, New York State's jobless rate was unchanged from 1982 to 1983 at 8.6 percent. Nationally, the jobless rate dipped from 9.7 percent in 1982 to 9.6 percent in 1983, but remained well above the New York State rate for every month of 1983.

Area Economic Conditions

An economic strengthening was evident throughout the State's major areas from 1982 to 1983. Twelve of the 13 area business activity indexes posted increases over the year. Only Elmira, which was unchanged, failed to record an increase. Nassau-Suffolk (+12 points) and Poughkeepsie (+11 points) recorded the most significant year-to-year gains.

Nonagricultural wage and salary employment among the areas did not reflect the nearly universal upswing in business activity indexes. There was almost an even split between the number of areas that posted gains and the number which posted losses. The Nassau-Suffolk Area experienced the greatest relative advance (three percent), while Buffalo, one of the areas most affected by the recent recession, was off about two percent. Areas posting declines generally had a greater dependence on manufacturing industries. On the bright side, nonfarm jobs topped the prior year's totals by the fourth quarter 1983 in all of the State's

major labor areas except Buffalo, Glens Falls and Rochester. By year's end, all areas rose above the previous year's levels.

Manufacturing Employment Falls to Record Low

The index for factory output advanced four points over the year from 101 (1967 = 100) to 105, buoyed by increased activity levels in the fourth quarter. Beginning in April, the index for each month in 1983 surpassed the comparable period for 1982. By December, the index reached 110, a high-point for the year and the highest December level since 1979.

As with the Nation as a whole, manufacturing's role in the State's economy has continued to slip. Even with a rebounding economy, manufacturing employment levels were down over the year, as both durable- and nondurable-goods industries lost ground from 1982 to 1983. Total factory employment was reduced by close to four percent—from 1,352,500 in 1982 to 1,299,300 in 1983—falling to its lowest annual level since the data series began in 1939. With the exception of lumber and wood products; petroleum; and rubber and miscellaneous plastics products, every manufacturing industry fell off over the year. Durable-goods industries (−35,000) generally suffered the most significant job losses—machinery (−10,500) and instruments (−9,900) were the most severely affected components between 1982 and 1983. Losses were less sizable in the soft-goods sector (−18,100), with apparel (−6,900) leading the downward slide.

Average weekly earnings of manufacturing production workers in New York State rose from $323.98 in 1982 to $347.41 in 1983, an increase of 7.2 percent. This represents a respectable gain in real earnings, because of a rise of only 3.2 percent in the rate of inflation. Average weekly earnings for the Nation stood at $354.08, with an increase equal to the State's relative gain. The average hours worked in the State each week by production workers rose marginally over the year, from 38.8 in 1982 to 39.3 in 1983.

New Plants

A number of new manufacturing plants and expansions in New York State were announced in 1983. Among these were the following:

American Cyanamid Company is constructing a new $6-million office and computer complex at its Lederle Laboratories Division facility in Pearl River (Rockland County). The 51,000-square-foot structure will lead to 30 new jobs when completed. Lederle Laboratories is a major producer of vitamins and other medical and biological products.

Caldwell Manufacturing is relocating its window-hardware plant from Rochester (Monroe County) to nearby Ogden. A new 150,000-square-foot facility, under construction at a cost of $8 million, is slated to increase Caldwell's employment by 80. Completion is scheduled for early 1985.

Chronar Corporation, a New Jersey-based manufacturer of photovoltaic cells, is constructing a new $8-million facility in Port Jervis (Orange County). The 22,000-square-foot plant will employ up to 120 when completed in late 1984.

Danbury Pharmacal, Inc., of Danbury, Connecticut is building a $10-million pharmaceuticals plant in Carmel (Putnam County). When completed in Spring 1985, the 110,000-square-foot complex will employ 165.

Forest Products of Norwich, Inc., is constructing a new $20-million plant in Norwich (Chenango County) to produce feedstock and wood sugars. Completion is scheduled for early 1985, with 40 new jobs expected.

General Electric Company is adding 50,000 square feet of plant and laboratory space to is Research and Development Center in Niskayuna (Schenectady County). When completed in mid-1984, the $11-million project will create 25 new jobs and allow other employees to relocate from other areas of the Center.

Grumman Corporation is constructing a new $10-million plant in Bethpage (Nassau County) for engineering and producing software for the E-2C Hawkeye aircraft. Completion of the 70,000-square-foot facility is expected in mid-1984.

Gull Airborne Instruments, Inc., is building a 99,000-square-foot branch facility in Hauppauge (Suffolk County) for producing aircraft instrumentation and fuel systems. Project cost is estimated at $6 million to $7 million and will create 200 new jobs.

Hadco Printed Circuits, Inc., is adding 25,000 square feet of its printed circuit board plant in Owego (Tioga County). The $6-million project will create 216 jobs when completed in 1985 or 1986.

International Business Machines Corporation is relocating a portion of its office operations from Poughkeepsie (Dutchess County) to the Town of Wappinger, to a new $20-million facility presently under construction. The 225,000-square-foot complex will house several hundred employees, but no new jobs are expected.

Matrix Corporation is adding 86,000 square feet to its Matrix Instrument Division plant in Orangeburg (Rockland County), in a $6-million project expected to create 95 new jobs. Matrix Instruments produces video cameras, and computer graphic and film editing equipment.

National Micronetics, Inc. is completing a $5-million addition to its plant in Kingston (Ulster County), which produces computer-memory drives and memory recording devices. The project will add 100 jobs and 40,000 square feet to National's operations.

Par Microsystems Corporation is expanding its electronic cash register plant in New Hartford (Oneida County). An additional 30,000 square feet is being constructed at a cost of $7.5 million, and an undetermined number of jobs will be created. Par Micro is a subsidiary of Par Technology Corporation.

Saratoga Wood Products, Inc., will begin operations at a new facility presently under construction in Wilton (Saratoga County). The $6-million, 60,000-square-foot plant will employ 100 when completed during 1984.

United Technologies Corporation is adding 32,000 square feet at its Carlyle Compressor Company subsidiary plant in DeWitt (Onondaga County) as part of a $24-million expansion project. The new space will house production for a new line of compressors, heat pumps and heating equipment. When completed in the summer of 1984, about 140 new jobs will be created.

Trade Mixed

The retail trade and wholesale trade activity indexes both increased in 1983—the former was up six points to 97 (1967 = 100) and the latter rose three points to 114.

Year-to-year employment advances in trade were confined to the retail segment which added 28,900 jobs to total 1,043,200 in 1983. Employment in wholesale trade slipped about one percent, from 454,000 in 1982 to 449,600 in 1983. Each of the subgroups in retail trade also posted job gains, led by an 11,200 increase in employment in eating and drinking establishments. (About three out of every eight new retail jobs occurred in this category.)

Retail sales were up to an $81.5 billion total in 1983—a gain of $7.3 billion, or 9.8 percent, from the preceding year. New York just edged out the U.S., which posted a 9.3 percent increase in sales.

Construction Moving Forward—But Still Depressed

Construction activity in New York State, although displaying definite signs of improvement, was still at a depressed level. Despite an advance of six points from 1982, the construction activity index averaged out at only 53 (1967 = 100). Beginning in May, the index was higher than the like month a year earlier, and the

spread increased with each succeeding month until it hit double digits by the fourth quarter. November and December posted the biggest year-to-year increases (14 points). The December level was the highest since 1979.

Employment growth over the year was just under four percent, moving from 219,600 in 1982 to 227,900 in 1983. Better than seven out of every ten new construction jobs was posted in the special trade contractor category.

The value of construction contracts awarded in New York State in 1983 totaled $8.5 billion, a sizable 18-percent gain over 1982. The nonresidential and residential categories reported strong increases of 30 percent and 28 percent, respectively, far outweighing a five-percent decline in nonbuilding dollar volume.

According to estimates made by the New York State Division of Housing and Community Renewal, new housing units authorized in the State in 1983 rose to 36,029, a substantial 43-percent increase over last year. This marked the highest level since 1979.

Record Activity in Service and Finance Industries

The service industries continued to move forward during 1983. The service activity index established a new annual high, reaching an average of 152 (1967 = 100). The index was generally stable over the course of the year, going from 151 in January to 153 in December and established its high point of 154 in May. Employment growth in this sector continued to lead all others, increasing from 1,821,300 in 1982 to 1,869,100 in 1983. Services, which has long since replaced manufacturing as the leading employer, accounted for one out of every four nonfarm jobs in the State.

Finance-insurance-real estate, spurred by record stock market activity, reached an annual level of 217 (1967 = 100) for 1983, up five points from the previous year. Each month of 1983 surpassed the level of the comparable month a year earlier. Employment levels rose from 670,600 in 1982 to 686,400 in 1983 and established a new high point for the industry. Security and commodity brokers, dealers, exchanges and services, recorded the greatest increase—accounting for about seven out of every ten new jobs in the industry.

Travel and tourism continued to be an important contributor to the State's economy in 1983. Expenditures by travelers in the State rose from $11.6 billion in 1982 to $12.4 billion in 1983. The travel industry in New York, which continued to experience the largest number of overseas and Canadian arrivals of any state, directly supports 281,900 jobs in hotels and motels, restaurants, service stations and other travel-related businesses.

LARGE NEW MANUFACTURING PLANTS AND EXPANSIONS

Name of Company	*Project Site and County*	*Nature of Expansion*
Allentown Industries	Buffalo (Erie)	Addition to plant, office and warehouse
American Cyanamid Co. (Lederle Laboratories Div.)	Pearl River (Rockland)	New office
Anaren Microwave, Inc.	East Syracuse (Onondaga)	Addition to plant, office, laboratory and headquarters
Augie's Baking Co. Ltd.	Central Islip (Suffolk)	Addition to plant and office
Bay Mills Ltd. (Bayex, Inc.)	Albion (Orleans)	Addition to plant
Cadbury Schwepps Ltd. (Duffy-Mott Co., Inc.)	Williamson (Wayne)	New laboratory
Caldwell Manufacturing Co.	Ogden (Monroe)	New plant, office and warehouse
Chronar Corp.	Port Jervis (Orange)	New firm in new plant
Consolidated Medical Equipment, Inc.	Utica (Oneida)	Addition to plant, office, warehouse and laboratory

CONSTRUCTION CONTRACTS *Source:* F.W. Dodge Division, McGraw-Hill Information Systems Company. Proprietary data provided by special permission.

The value of construction contracts includes not only actual awards, but also the value of certain commitments to build, not covered by contract, as in residential developments. The contracts precede actual construction. Included under *Nonresidential Buildings* are such structures as factories, stores, office buildings, banks, schools, service stations, prisons, churches, warehouses, hospitals and airport buildings. *Residential Buildings* include hotels, motels and dormitories as well as one- and two-family houses and apartment buildings. Under *Nonbuilding Structures* are such heavy engineering projects as streets and highways, bridges, sewers, water-supply systems, airports (but not the buildings) and electric light and power systems.

EMPLOYMENT *Source:* New York State Department of Labor.

Estimates of employment in nonagricultural establishments are made for the State and the larger labor areas. The industries for which estimates are provided individually are the principal ones in each area. The totals do not include the self-employed, the military, farm workers and the employees of international organizations or private households.

Employment covered by unemployment insurance is less inclusive. It excludes not only the groups omitted from nonagricultural employment, but also workers for employers with less than $300 and those for household workers with less than $500 in payroll for a calendar quarter, and for interstate railroads and government. Data from this source ordinarily become available six to eight months later than the estimates of nonagricultural employment. However, they provide greater detail by industry than is available from the estimates, and give separate figures for each county—those combined in the multicounty industrial areas of the nonagricultural employment estimates as well as the smaller counties outside these areas. For any industry group, data are withheld in any county, metropolitan area or economic area for which the total might disclose information about a single establishment. In any county or area with only one nondisclosable industry, information has been withheld from a second to prevent subtraction of detail from the total to derive a withheld figure. Data in the table *Business Establishments, March 1983* are the reporting units covered by unemployment insurance distributed according to the number of employees per unit. A reporting unit is normally a single place of business, but it may be only part of one when functions in more than one industry, carried on by a firm at one location, are reported as separate units, and it may be several places of business when the branches of a firm, within one county and in the same industry, are reported as one unit.

The classification by industry in both series is that of the 1972 Standard Industrial Classification; employment in central administrative offices, research laboratories and other auxiliary facilities of manufacturing companies is included in the appropriate manufacturing industries; the totals include some duplication because dual job holders are counted twice; and all the figures are as of the place of employment, not the place of residence.

NOTE: Details may not add to totals, due to rounding.

CIVILIAN LABOR FORCE Source: United States Department of Labor; New York State Department of Labor.

Total Employment includes all employees in private and government employment, self-employed persons and unpaid family workers, by place of residence. *Total Unemployment* includes all persons who during the mid-week of the month were able to work, were available for work and were seeking work but were without employment during the entire survey week. *Total Labor Force* is the sum of total employment and total unemployment. The *Unemployment Rate* is total unemployment as a percentage of the civilian labor force.

EMPLOYMENT, 1982 (Covered by Unemployment Insurance)

*Data withheld to avoid disclosure.

1. For metropolitan area definitions, see page 23.

NOTE: The New York State totals include employment which was not assigned to any county; totals and subtotals for specific industries include employment withheld for counties or areas, to avoid disclosure. For counties or areas where employment for some industries is withheld, the amount is combined with employment in establishments not classified in a specific industry in the "Other" column.

STANDARD METROPOLITAN STATISTICAL AREAS

Area	*Definition*
Albany-Schenectady-Troy	Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties
Binghamton	Broome and Tioga counties (New York Portion) plus Susquehanna County, Pennsylvania
Buffalo	Erie and Niagara counties
Elmira	Chemung County
Glens Falls	Warren and Washington counties
Nassau-Suffolk	Nassau and Suffolk counties
New York	New York City plus Putnam, Rockland and Westchester counties (New York Portion) plus Bergen County, New Jersey
Newburgh-Middletown	Orange County
Poughkeepsie	Dutchess County
Rochester	Livingston, Monroe, Ontario, Orleans and Wayne counties
Syracuse	Madison, Onondaga and Oswego counties
Utica-Rome	Herkimer and Oneida counties

PERSONAL INCOME *Source:* United States Department of Commerce.

Total personal income consists of private and government salary payments (both cash and in kind) before deductions for income and other direct personal taxes, but after deductions for social insurance programs. Also included are receipts from other labor income, farm and nonfarm proprietor's income; interest, net rents, dividends and transfer payments.

Per-capita income is obtained by dividing total personal income by population estimates, provided by the U.S. Bureau of the Census.

Research bulletins, which contain detailed information on personal income, are prepared annually by the New York State Department of Commerce.

MISCELLANEOUS *Sources:* New York State Department of Education; Federal Deposit Insurance Corporation, *Summary of Deposits in All Commercial and Mutual Savings Banks, June 30, 1983;* New York State Department of Motor Vehicles.

High School Graduates, 1983 are all public, parochial and other private school pupils receiving diplomas during that school year. This includes those who received a diploma after attending evening or summer sessions, and those who graduated in February, as well as regular June graduates. Also included in the total are 48,112 persons who passed high school equivalency tests. *Bank Deposits, June 30, 1983* include *Demand* deposits of individuals, partnerships and corporations in all commercial banks and *Time* deposits, which include savings and other time deposits of these groups in commercial banks plus savings deposits in all savings banks. Governmental and interbank deposits are excluded from these totals. Deposits of branch banks are included in the county of the branch. The New York State total *Motor Vehicle Registrations, 1983* is larger than the sum of the county figures because it includes vehicles owned by out-of-state residents; county and area totals have been adjusted to a by-resident basis. *Commercial* motor vehicles are trucks only. *Other* motor vehicles include buses, taxis, ambulances, trailers, farm vehicles, mopeds, rental cars and motorcycles. The total is based on when registration fees were paid, rather than on when they were due. The distributions between *Commercial* and *Other* are partially estimated.
